

Call for (Re-)Submissions to the 17th International Conference on Motivation (ICM)

Dear Colleagues,

We are excited to move forward with picking up the organization of our (now partly) joint SIG8 & SIG16 conference with the theme "Motivation and Emotion meets Metacognition and Self-regulated Learning":

We are honored and happy to host

- the 17th International Conference on Motivation (ICM), i.e., the bi-annual conference of the EARLI-Special Interest Group "Motivation and Emotion" (SIG8), as well as
- the joint events of the 2022 "SIG8 meets SIG16 conference" of the EARLI Special Interest Groups "Motivation and Emotion" (SIG8) and "Metacognition" (SIG16)

from August 24th to 26th, 2022 in our beautiful city of **Dresden**.

Given the pandemic uncertainties, we plan the SIG8 and joint SIG8&16 events in a hybrid format, hoping that in the Summer of 2022 the situation will be better. Right after the joint SIG8&SIG16 events, SIG16 is planning an additional SIG-specific meeting.

With this call for (re-)submissions, the local and international organizing teams invite (re-)submissions of proposals to the 17th International Conference on Motivation (ICM) in Dresden.

Today's social and economic developments require education to prepare students for a dynamically developing global and technological world. Research in the fields of Motivation, Emotion, Metacognition, and Self-regulated Learning is of particular importance for developing approaches that empower people to act flexibly and be adaptive in different roles and fields, and to actively contribute to interaction, collaboration and knowledge generation in a world of rapid and complex changes.

The joint events of the conference will be a place to go beyond disciplinary boundaries by sharing and discussing research issues and findings from all fields of Motivation, Emotion, and Metacognition. It will also offer great opportunities for detecting new pathways for collaborations that will contribute research findings to inform the design of environments for smart learning and instruction.

We are very much looking forward to receiving your (re-)submission of proposals. Join us for this unique event, and contribute your best research.

Dates to remember

November 29th, 2021

January 31th, 2021

March 20th, 2022

April 20th, 2022

May 20th, 2022

August 24th - 26th, 2022

Start of proposal submission

Deadline for proposal submission

Notification of acceptance

Deadline for authors' registration

Deadline for early bird registration

Join the conference

Submission Policies

The preparation of the scientific program with the conference system requires that all proposals have to be submitted and processed (again) via the submission procedure. Thus, **not only new proposals, but also proposals already submitted and accepted in 2020 need to be (re-)submitted**. During the submission process, submitters will be asked to indicate whether their contribution is an (updated) resubmission or a new submission. New submissions will be peer reviewed, while previously accepted submissions will continue to be accepted. Please be aware that EARLI policies require committing with publication ethics that proposals should not have been presented elsewhere before.

Note that in order to provide as many researchers as possible with the opportunity to present their work at the conference, we have to restrict the number of active contributions for each person. Thus, we encourage you to (re-)submit only one proposal as a presenting author. The submission system will not allow more than two. In addition, you can serve once as the organizer of a symposium and once as a discussant. We also warmly welcome you to serve as a chair for a conference session (not including symposia), by signing up for this role through the submission system. Moreover, you may participate as a non-presenting co-author for further contributions.

All presenting authors of accepted papers and all participants in accepted sessions (presenting authors, chairs, and discussants) are expected to register by **April, 20th, 2022**, to attend the conference, and to be present at the scheduled sessions.

Resubmissions

Authors of the many high-quality proposals accepted for presentation at "SIG8 meets SIG16" in 2020 have the opportunity to resubmit their accepted papers for ICM 2022. In the event of a resubmission,

- Submitters confirm that the contribution has not been presented at any other conference in the meantime, and
- Contributions must be submitted as the submission type (i.e. paper, poster, symposium) in which they were **accepted** in 2020.

Submitters may also choose to upload their paper in its original 2020 format or in an updated version.

A contribution is considered an updated version of the 2020 contribution if:

- minor revisions taking into account the conference reviewers' comments have been made;
- the 2020 submission explicitly indicated that the data analyses are preliminary and will be extended, and it now includes the results of the planned data analyses;
- if data collection in the 2020 submission was described as not yet complete, and it now includes the results of further data analyses with the planned expanded sample size.

New Submissions: Types of Contributions and Sessions

In addition to the resubmission, we invite the submission of individual contributions (i.e., papers; posters), and symposia. Both empirical and theoretical proposals grounded in the current state of the art are welcomed.

Paper

Paper sessions include oral presentations of four papers, followed each by a discussion with the audience. To be accepted, empirical papers must contain research questions grounded in the state of the art, data, methods, and results. Theoretical papers are welcome if they build on a synthesis of prior work, and reveal open issues for future research. Research at its earlier stages is most suitable for poster sessions.

Poster

Poster sessions offer the chance to visually and graphically present findings from empirical and conceptual work. They provide manifold opportunities to engage in interaction and discussion with colleagues. Posters are ideal for both, work in advanced and earlier stages. Furthermore, they provide room for presenting novel, promising ideas.

Symposium

Symposia provide an opportunity to present research on one topic, often from multiple perspectives, compiling a coherent set of papers for discussion. Symposia sessions are directed by a chair, involving 4 presenters and a discussant, from at least three different countries. A symposium will be submitted by the symposium organizer as a single submission, including all individual contributions and on behalf of all authors. The symposium submission should include a description of the symposium (250 words) as well as the single papers' abstracts and extended summaries for all the papers to be presented as part of the symposium. We recommend that each individual submission is checked in terms of quality, relevance, and coherence to the topic of the symposium. Each symposium is scheduled for 90 minutes, allowing 12-15 minutes of presentation time per speaker, 15 minutes for the discussant, and 15 minutes for open discussion.

Submission Guidelines and Procedure

All proposals must be in English and submitted electronically through the EARLI submission system:

<https://www.earli-eapril.org/>

Prospective participants need a valid EARLI account to **submit** a contribution. If you do not have an account, you can get it through the EARLI-submission system. Please note that you do not need to be an EARLI-member.

Each individual submission requires

- a title of up to 100 characters (including spaces),
- an abstract of 100-250 words
- an extended summary of 500-1.000 words (including references)
- optional: up to three images or tables that can be uploaded along with your submission.

All submissions should be done completely anonymously, to ensure a fair review process. Please do not include your name in your abstract or in any of your uploaded documents. All submissions will be reviewed blindly by at least two experts active within the specific field of research. The extended abstract must address and will be reviewed on the following elements:

1. Relevance to the domains of Motivation, Emotion, and/or Self-regulated Learning
2. Objectives or purposes
3. Theoretical framework, conceptual rationale, or pragmatic grounding
4. Research methods and design (empirical contributions) or embeddedness in the relevant literature (theoretical contributions)
5. Results and/or substantiated conclusions or warrants for arguments/point of view
6. Significance for theory, policy, and practice (empirical contributions) or theoretical debate (theoretical contributions)

Symposia organizers: Please mind the three-country rule and that all your active participants (i.e. presenting authors, chair(s) and discussant) need an EARLI account. Co-authors do not need an EARLI account since their names and contact details can be entered manually by the submitter.

To find the appropriate keywords for your submission use the drop-down menu in the submission system.

The submission system will be open from November 29th, 2021 until January 31th, 2022.

For any questions regarding the conference or the submission, please contact the local organization team at

info@SIG8meetsSIG16-Dresden.de.
